

Ubuntu Server & Desktop Admin Labs (Overview)

Core Objectives

- 1 Deploy and secure Ubuntu Server.
- 2 Configure internal domain services.
- 3 Centralize authentication and user management.
- 4 Join Ubuntu Desktop clients to a domain.

Domain & Identity Management

- 1 Create an internal domain (e.g., corp.local).
- 2 Manage users and groups centrally.
- 3 Provide DNS and authentication services.

Client Integration

- 1 Configure Ubuntu Desktop to authenticate against the domain.
- 2 Enable domain user logins.

Real-World Relevance

- 1 Mirrors enterprise Active Directory environments.
- 2 Applies to system administrator and network administrator roles.
